A message from the VESKI Chairman

In a little under nine days time, VESKI will welcome Dr Jonathan Rosen, Special Assistant to the Provost's Office and Senior Research Fellow for Entrepreneurial Studies at Boston University, USA to Melbourne. This will be Dr Rosen's second visit to this great city and we are delighted that he has accepted an invitation to deliver our 9th VESKI International Connections Program.

The VESKI **International Connections Program** assists in bringing world-renowned scientists and leading edge researchers to Victoria. By building global connections, VESKI is able to facilitate world-class education and training for the Victorian community through the sharing of knowledge and experience at forums including seminars, symposiums and public lectures.

This forthcoming International Connections Program is no exception; assisted by the kind support of the Bio21 Cluster, this week long program will focus on commercialization and management expertise and encouraging cross-sector integration.

I implore you to read on and find out more about the programs being delivered including public lectures and industry specific sessions. Don't forget to register for the FREE individual sessions to let us know you'll be attending.

Regards,
Professor Snow Barlow.
